

Buildkite

Faster builds. Smarter automation.

Buildkite is a CI and build automation tool that combines the power of your own build infrastructure with the convenience of a managed, centralised web UI.

Buildkite's centralised web service handles job distribution, agent monitoring, integration with GitHub and Slack, and provides everyone on your team with an elegant interface for monitoring builds, tailing logs and downloading artefacts.

Buildkite generously co-sponsored food & drink to keep you nourished, curious, and inspired for the day.

Visit buildkite.com and use the promo code **PLIBMTTBHGATY** for a \$60 USD credit.

FastMail

Email, calendars and contacts done right.

With an elegant web interface that's faster than native apps, and 15 years experience running a rock-solid service, it's easy to see why FastMail is a leading choice of businesses, families and professionals worldwide.

FastMail is an independent, employee-owned company based in Melbourne, Australia.

FastMail generously co-sponsored food & drink to keep you nourished, curious, and inspired for the day.

LOOKAHEAD

We help top companies build web and mobile development teams.

We look ahead to emerging technologies and long term relationships. We locate the best software engineers and place them in rewarding work environments.

Our connections go deeper than most recruiters. We have grown up with technology, made it our livelihood and worked in technical roles. Then we started recruiting.

Lookahead Search generously co-sponsored food & drink to keep you nourished, curious, and inspired for the day.
